Aboveground Storage Tanks Vapor Recovery Workshop

Dear Sir or Madam:

The Air Resources Board (ARB) is developing enhanced vapor recovery (EVR) standards for vapor recovery systems using aboveground gasoline storage tanks (ASTs). It is ARB's intent to apply EVR standards for AST vapor recovery systems through a new rulemaking process. The ARB is scheduled to consider the AST EVR rulemaking package at its December 2003 Board Hearing.

We invite your participation at the September 11, 2003, AST EVR workshop. The purpose of this workshop is to provide an update on ARB's current and future efforts towards adopting AST EVR standards.

Workshop logistics are as follows:

DATE: Thursday, September 11, 2003

TIME: 9:30 a.m. to 12:00 p.m.

LOCATION: California Air Resources Board
Monitoring and Laboratory Division
1927 13th Street, 1st Floor Conference Room
Sacramento, CA 95814

Arrangements have been made to provide teleconferencing at this workshop. The teleconferencing information will be provided on the workshop agenda, which will be posted approximately one week prior to the workshop on our vapor recovery web page at www.arb.ca.gov/vapor/vapor.htm. Information related to prior workshops held pertaining to this rulemaking item is located at www.arb.ca.gov/vapor/ast/archive.htm.

This meeting location is accessible to persons with disabilities. If you have special accommodation or language needs, please contact Elizabeth Mongar at (916) 327-0900 as soon as possible. TTY/TDD/Speech-to-Speech users may dial 7-1-1 for the California Relay Service.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Website: <http://www.arb.ca.gov>.
